District Profile: A Labour Market Profile of Newark and Sherwood

Labour Market Profile

Newark and Sherwood
March 2009

About Place Profiles

Place Profiles are a series of reports available from the Local Futures Group that provide an assessment of local conditions. Using the latest data at the time of creation, they are available for a range of economic, social and environmental themes at sub-region through to neighbourhood level. The reports present a range of graphical outputs, together with a summary analysis of performance that is set within a regional and national context.

More information about the profiles and how to purchase further copies is available at the end of this report.

About the Local Futures Group

The Local Futures Group comprises a team of researchers and consultants with academic, corporate and policy backgrounds. We provide a geographical perspective on economic, social and environmental change. We introduce this perspective into public policy and corporate strategies, both in the UK and internationally. Our services include:

- **Benchmarking:** a family of benchmarking services that ensure future strategies are underpinned by a clear and shared understanding of current conditions. These provide a comprehensive analysis set within a regional and national context.
- **Strategy:** research and support services to identify future drivers of change and develop long-term strategies.
- **Monitoring:** online services to monitor change and assess the impact of strategies.

These services are underpinned by our subscription service **Local Knowledge:**

Local Knowledge is regarded as a powerful web-based service for local strategies and marketing. Incorporating the latest thinking on competitiveness and sustainable development, it provides researchers and policy-makers with access to an unrivalled decision support tool that is interactive and easy to use.

To find out more about our services or to arrange a free trial of Local Knowledge please give us a call on 020 7440 7360 or email info@localfutures.com

Labour Market Profile: Newark and Sherwood

Introduction

The EU Lisbon Strategy set an employment rate target of 70 per cent by 2010. In this profile we use the employment rate as an overall measure of labour market performance in Newark and Sherwood, but also present a range of other measures, such as unemployment, youth unemployment and long-term unemployment rates to provide a fuller analysis of labour market conditions.

Newark and Sherwood is ranked 266 out of 408 districts on our labour market score, indicating participation rates within the resident working age population that are in the bottom 40% of districts nationally.

With a labour market score of 99.23, Newark and Sherwood is below the national median. This is shown in the map, where areas with very dark shadings score highly and those with very light shadings score poorly.

In 2008, 74.10% of the resident working age population were in employment. By comparison, the Nottinghamshire figure was 71.82%, the East Midlands figure was 75.90% and the national figure was 74.67%.

A glossary of the terms and definitions used in this profile are included at the end of the report.

Newark and Sherwood
March 2009

Labour Market Indicators

The spider chart is a way of showing how Newark and Sherwood rates against the national median. Data for every district in Great Britain is converted into a percentile score, with the top ranking area scoring 100 and the bottom zero. The national median is shown by the 50th percentile. The chart shows that Newark and Sherwood scores relatively well by national standards on our labour market composite score. The chart also shows how Newark and Sherwood performs on a range of related labour market measures.
